American Society of Crime Lab Directors Crime Lab Minute

General Announcements

Vendor Sponsors

Dear Colleagues-

Input on the structure of the SWG's and a "brief" Survey request

Please find attached a recent solicitation by the National Institute of Standards and Technology (NIST) for input into the formation and organization of the Scientific Working Groups (SWG's). The ASCLD Board of Directors welcome your comments regarding this announcement and are requesting that you provide us input. We feel that this is a significant development and want to make sure that the voices of our membership are heard. Our intent is to develop a consensus document that best represents the views of our members within the community. Please send your comments to Past-President Jill Spriggs at SpriggsJ@sacda.org by October 30.

[NIST SWG Survey](#)

Understanding the forensic workforce

The Department of Sciences in Washington D.C. and the College of Business & Economics at West Virginia University are requesting that you and your staff participate in a brief survey (3-4 minutes). This information will be published in our journal, the Forensic Science Policy and Management. Please consider taking this survey and forwarding it to your staff.

This is a request for you to take part in a research project to identify items that characterize strategic understanding of the forensic workforce. The purpose is to better inform managers and the literature regarding effective workplace marketing. Your involvement in this project will be kept confidential. All data will be analyzed and reported in the aggregate. We will not ask any information that should lead back to your identity as a

Ron Smith And Associates, Inc.
is your #1 source for:

Forensic Evidence Training
Forensic Consulting Services
Multi-Level Competency Testing
ISO Accreditation Mentoring

Need a custom solution? RS&A is the answer!
Contact us today to discuss your specific needs.

participant. Your participation is completely voluntary and anonymous. The information is intended for research use only

We hope that you will participate in this research project, as it could be beneficial in understanding the attractiveness of the workplace and how to encourage a diverse population into the forensic field. Thank you very much for your time. Should you have any questions about this letter or the research project, please feel free to contact us at dfsquality@gmail.com.

We thank you for your time and value your responses, and look forward to sharing the findings.

You can start right now by clicking on the link: <https://www.surveymonkey.com/s/2PSFKN2>

ASCLD President

International Initiatives

The International Forensic Strategic Alliance (IFSA) has created a survey to determine how it can add value to your network. Thank you for taking the time in answering this survey which includes 18 questions. Your answers will help IFSA define a strategic plan for meeting the needs of your organization. Please click on the link below to start the survey
<http://surveys.questionpro.com/a/t/AGGeDZPwOB>

The National Institute of Forensic Science/Australia New Zealand Policing Advisory Agency is conducting a study on manufacturer DNA contamination. A survey ([download the spreadsheet form here](#)) has been developed which will capture information to map out the issue and identify possible sources and points of product contamination. The results will be used in the development of the ISO Standard "Minimizing the risk of human DNA contamination in products used to collect and analyze biological material for forensic purposes". Preliminary results will be presented at ISFG in September and full results

[Bode Technology](#) provides advanced forensic solutions offering crime labs ways to reduce their workloads and budgets.

Bode's solutions include [BodeDirect™ Outsourcing](#) and [Same-Day DNA Service™](#), and the [Bode Buccal DNA Collector™](#), a direct collection system, reduces processing time, saving money for crime laboratories.

Bode's newest offerings include:
[BodeLIMS™ – The First True Forensic DNA LIMS](#). BodeLIMS is a web-based LIMS that tracks samples from receipt through reporting. The software documents and captures the entire DNA analysis process and is completely configurable, thus adaptable to changing technologies.
[Bode LeanLab™](#) service utilizes Lean Six Sigma principles and delivers custom solutions to forensic labs improving efficiency, increasing throughput, reducing turnaround time and eliminating backlogs.
Visit www.bodetech.com or email bode.service@bodetech.com for more information.

will be presented at the ISO PC/272 Meeting in February.

Please send your responses to Dr. Linzi Wilson-Wilde, General Manager at NIFS by August 21, 2013 if possible.

linzi.wilson-wilde.nifs@anzpaa.org.au

Thank you for taking the time to fill out the survey

Loyola University New Orleans

Designed in response to the growing need for leadership in forensics, the Forensic Science Administration specialization of the Master's in Criminal Justice Administration (MSCJA) prepares you with the advanced skills needed to lead forensic labs and crime scene investigation departments from the crime scene to the courtroom.

Topics of study include:

- Develop an advanced understanding of operations, management and administration
- Bridge the gap of understanding between scientists and laypersons, judges and lawyers
- Learn the role of ethics in forensic science, including general principles and training requirements
- Learn effective techniques and communication skills to improve expert testimony

Sorenson Forensics provides forensic DNA casework services for federal, state and local crime laboratories; law enforcement agencies; and assists Officers of the Court in individual criminal cases. Sorenson Forensics is a unique private forensic DNA laboratory. We are built upon a foundation of collaborative forensics with law enforcement agencies, advanced lab technology and our unique experience. More than 500 law enforcement agencies have turned to Sorenson Forensics for individual casework and DNA testing services. We provide comprehensive biological screening, including:

blood, semen, and saliva identifications. We also offer Y-screening (using Plexor HY), a more sensitive alternative to traditional screening that directly detects the presence of male DNA. Sorenson Forensics scientists and technicians have extensive public lab work experience, creating an environment empathetic to the issues which public labs face. Our veteran team with combined public and private lab work history have decades of forensic DNA experience and have completed thousands of individual cases. Some of the highest profile cases in the country have been sent to the Sorenson laboratory because of this unique expertise. The growing reputation for excellence has spread internationally with a world-wide clientele now using Sorenson Forensics. <http://sorensonforensics.com>

Calibrate, Inc. founded the pipette calibration industry in 1983 and remains North America's leader in the business. No one knows pipettes better. ISO 17025 Accredited since 2004 (by the American Association of Laboratory Accreditation, or A2LA, a signatory to the ILAC MRA), our focus is on quality.

We work nationwide and in eastern Canada, either on-site or in one of our three mail-in laboratories.

Pipette service is available for all makes and models of pipettes as well as bottle-top dispensers and pipet-aids. We offer an extended warranty on all parts and labor, and are known for delivering high quality work and excellent customer service. We solve problems. It was for these reasons that we were recently chosen by Business Leaders magazine as a 2009 Business Champion.
